

HV electrician/engineer, Poland

Frist:
13-04-2025

Are you an experienced HV electrician/engineer with the right mindset and the desire to work in offshore wind.

The green transition is booming, and **we need more colleagues to join our team** to be able to make our contribution in securing a stable and green energy supply. We are working closely together with our customers on different project all over the world, primarily with wind turbines offshore.

We offer you permanent employment in a company with high ambitions and naturally an intense focus on safety and quality. You are a fully trained HV Technician with experience in MV/HV installation and commissioning work in the wind industry. You will be assigned to projects mainly in Europe, USA, and Asia.

At DELPRO you will be a part of a team of colleagues where flexibility and mutual trust is the main keywords. In DELPRO we focus on continuous developing our employes, here you will have the possibility to influence on your future competences.

Your tasks will be:

- Travel to different sites onshore and offshore
- Install high voltage cables in wind turbines
- Connect cables, switchgear and transformers
- Test installations on site
- Ad hoc tasks

Your qualifications and competences

- You are educated as an electrician
- Having *Siemens Gamesa HV experience* is favorable, but not essential
- Physical fit (able to pass Chester step, min. "good" and OGUK medical)
- Valid driver's license
- Write and speak English professionally (Level B1 or B2)
- Be able to document previous employment and tasks

Are you ready to join the team? Please forward your CV with certificate today using the link for Job & Career at our website www.delpro.dk. You are welcome to contact Global Operational Manager **Peter Sallo**, DELPRO Wind, at **+45 4213 1107** or **pem@delpro.dk**, if you have any questions.
